

SaiKet Systems

Internship Program

Java Development

About Us

- Saiket Systems is a prominent technology company renowned for its expertise in the dynamic fields of cloud computing, blockchain, artificial intelligence (AI), and machine learning (ML).
- The company excels in delivering impactful projects and solutions tailored to the evolving needs of businesses.
- Saiket Systems offers a diverse array of products and services, including robust cloud computing solutions, innovative blockchain technologies, advanced AI systems, and sophisticated ML algorithms.

Instructions

- Update your LinkedIn profile with your achievements, like offer letters or internship certificates from SaiKet Systems. Mention and tag SaiKet Systems in your posts. Use hashtags like #SaiKetSystemsJourney #SaiKetExperience #FutureWithSaiKet to showcase your association.
- Avoid plagiarism and code duplication. These violations can lead to internship termination and future opportunities loss with us.
- Create a video showcasing your completed tasks. Post it on LinkedIn, tag SaiKet Systems, and use hashtags like #SaiKetInnovation #SaiKetAchievements #SaiKetProjects to engage with our community.

SUBMISSION

- Create a professional video showcasing your internship projects and achievements.
- Host the video on LinkedIn to provide proof of your work and establish credibility among your peers. Consider tagging SaiKet Systems in your posts to ensure they are notified of your work.
- A SUBMISSION FORM will be shared later. Till then please continue your task and make a separate file of each level.
- When posting the video on LinkedIn, include the following hashtags to maximize visibility and engagement: #saiketsystems #saiket #saiketsys. Additionally, depending on your internship domain.

SaiKet Systems

Task 1: Calculator Application

Description:

Build a basic calculator application enabling arithmetic operations. Create a user-friendly menu for selecting operations, input numbers, and handle edge cases, such as division by zero, using exception handling. Strengthen your understanding of core Java concepts like methods and conditionals through this task.

Skills:

- **Core Java Concepts (Methods, Conditionals)**
- **User Input Handling**
- **Exception Handling**

Task 2: Temperature Converter

Description:

Create a temperature converter that handles Celsius to Fahrenheit and vice versa. Allow users to choose input and output scales. Implement conversion formulas and provide clear results. This task reinforces your Java programming skills and mathematical operation implementation.

Skills:

- Core Java Concepts (Methods, User Input)
- Mathematical Operations

Task 3: To-Do List Application

Description:

Develop a to-do list application where users can manage tasks. Use classes to represent tasks, incorporating attributes like title and status. Implement functions for adding tasks, marking them as complete, and displaying the task list. Enhance your knowledge of object-oriented programming and data structure manipulation.

Skills :

- Object-Oriented Programming (Classes, Objects)
- Data Structures (Lists)
- Conditional Statements

Task 4: Number Guessing Game

Description:

Create a number-guessing game where users guess a random number. Provide feedback for high or low guesses and track attempts. Implement loops for multiple attempts and reinforce your skills in handling random numbers and conditional statements.

Skills :

- Core Java Concepts (Random Numbers, Loops)
- User Input Handling
- Conditional Statements

SaiKet Systems

Task 5: Text File Analyzer

Write a program to analyze a text file, counting words, lines, and characters. Implement functionality to search for specific words. Utilize file I/O, string manipulation, and exception handling. This task strengthens your file-handling skills and text-processing abilities in Java.

Skills :

- File Input/Output in Java
- String Manipulation
- Exception Handling

Task 6: Basic Banking System

Description:

Develop a basic banking system where users can manage accounts, perform transactions, and view balances. Utilize classes for representing bank accounts and handle operations like deposit, withdrawal, and transaction history. This task enhances your understanding of classes, inheritance, and exception handling.

Skills: -

- Object-Oriented Programming (Classes, Inheritance)
- User Input Handling
- Exception Handling
